Comput. Methods Appl. Mech. Engrg. 157 (1998) 451-452

**Computer methods  
in applied  
mechanics and  
engineering**

## Contents Volume 157

### Volume 157, Nos. 1-2, 28 April 1998

- A projection method for constructing a mass conservative velocity field  
*S. Chippada, C.N. Dawson, M.L. Martínez and M.F. Wheeler* 1
- Exact evaluation of dissipation for elastic-damage model dynamics  
*L. Briseghella, C. Majorana and P. Pavan* 11
- Anti-optimization technique for structural design under load uncertainties  
*M. Lombardi and R.T. Haftka* 19
- The solution of the Boussinesq equation using the method of lines  
*A.G. Bratsos* 33
- A new a posteriori error estimation for nonlinear time-dependent finite element analysis  
*P. Ladevèze and N. Moës* 45
- A numerical method for computing the overall response of nonlinear composites with complex microstructure  
*H. Moulinec and P. Suquet* 69
- Load and motion transfer algorithms for fluid/structure interaction problems with non-matching discrete interfaces: Momentum and energy conservation, optimal discretization and application to aeroelasticity  
*C. Farhat, M. Lesoinne and P. LeTallec* 95
- 3D Delaunay mesh generation coupled with an advancing-front approach  
*P.J. Frey, H. Bouchakri and P.-L. George* 115
- Explicit multi-time stepping methods for convection-dominated flow problems  
*N.M. Maurits, H. van der Ven and A.E.P. Veldman* 133
- Finite element computation of unsteady viscous compressible flows  
*S. Mittal* 151
- Announcement: EUROMECH meetings in 1998 and 1999 177

### Volume 157, Nos. 3-4, 11 May 1998

#### Special issue: Papers presented at NMCM 96

- Preface 183
- Part 1*
- Fast solution techniques for the symmetric boundary element method in linear elasticity  
*O. Steinbach* 185

The application of coupled BE/FE formulations in technical magnetic field computations <i>M. Kuhn</i>	193
The application of object-oriented methods to boundary elements <i>C. Lage</i>	205
Efficient automatic quadrature in 3-d Galerkin BEM <i>S. Erichsen and S.A. Sauter</i>	215
The computation of potentials near and on the boundary by an extraction technique for boundary element methods <i>H. Schulz, C. Schwab and W.L. Wendland</i>	225
Integration of singular integrals for the Galerkin-type boundary element method in 3D elasticity <i>H. Andrä</i>	239
Singular integrals and boundary elements <i>V. Sladek and J. Sladek</i>	251
A wavelet algorithm for the boundary element solution of a geodetic boundary value problem <i>A. Rathsfeld</i>	267
A multipole expansion technique in solving boundary integral equations <i>C. Gáspár</i>	289
<i>Part 2</i>	
Local effects in engineering with macro-elements <i>E. Schnack, Sz. Szikrai and K. Türke</i>	299
The <i>hp</i> finite element method for problems in mechanics with boundary layer <i>C. Schwab, M. Suri and C. Xenophontos</i>	311
Edge layers in thin elastic plates <i>M. Dauge and I. Gruais</i>	335
Numerical approximation of a singularly perturbed contact problem <i>M. Costabel, M. Dauge and M. Suri</i>	349
Thermal generalized stress intensity factors in 2-D domains <i>Z. Yosibash</i>	365
<i>Part 3</i>	
Finite element approximation of a nonlinear heat conduction problem in anisotropic media <i>M. Křížek and L. Liu</i>	387
An adaptive space-time finite element model for oxidation-driven fracture <i>F.L. Carranza, B. Fang and R.B. Haber</i>	399
Domain decomposition method for the <i>h-p</i> version finite element method <i>B. Guo and W. Cao</i>	425
